HITTCO TOOLS

A FRONTRUNNER IN INNOVATION & CUSTOMER-CENTRICITY IN THE INDIAN CUTTING TOOLS MANUFACTURERS SPACE

Yash Vardhan Bhandari,
Executive Director

The Indian cutting tools manufacturers market is growing rapidly especially in the Automotive, Defence, Power generation and Renewable energy sector. This coupled with the 'Make In India' initiative is creating a positive market growth in India. With India's industrialism and infrastructure continuing to grow, so will the cutting tools market with newer and more improved technologies in the manufacturing of the cutting tools. Hittco Tools is one of the pioneering organizations in the Indian cutting tools manufacturers market and over the years, the company has been able to develop into one of the most preferred names in the industry. The company was founded in 1974 by Surendra Bhandari with a line of HSS (high speed steel) tools and in 2008, Hittco tools was presented with the carbide tools plant by Sidharth Bhandari. Now, the demand for Hittco Tools is increasing constantly and the company has been able to cement its position as a high-caliber player in the market offering an exceptional range of tools. As of now, the company is aggressively expanding its product line as well as its distributorship network PAN India.

Precision & Quality

To cater to the varied requirements of its clients, Hittco Tools has created an impressive product portfolio which includes high performance solid carbide rotary tools, high speed cobalt and micro drills for watch and writing industries. The company also produces specialized tools for its clients in various industries such as aero-space and aviation which can only be used for a specific purpose by only that client. While talking

more about its operations and how it addresses the problems faced by its clients, Yash Vardhan Bhandari, Executive Director says, "We work on technical solutions application to cut down the cycle time and cost per component as far as the cutting tools are concerned. The major pain points faced by customers are usually to do with precision and materials, as the slightest change in micrometers can render the tool ineffectual. We solve this by having a close relation with our clients and regularly sending a representative to their respective units to re-confirm the exact precision and recommend any new coating materials they would require".

Hittco Tools acknowledges the importance of having the right tools and infrastructure to consistently improve the quality of its products and so the company is equipped with the latest CNC machines and measuring instruments. Also, the products offered by the company are 100 percent checked in every stage and again in the final QC. On top of that, the company uses plethora of methods, including conducting the proper enquiry after evaluating the manufacturing process, sending them technical and commercial offer, and technical team visits to the end user to guide with parameters to run the tools to ensure optimal customer satisfaction.

As of now, Hittco Tools is aggressively expanding its product line as well as its distributorship network pan India

Rajib Ghosh Roy, who serves as the CEO, leads Production and Sales team and has played a crucial role in the growth and advancement of Hittco Tools. Furthermore, the company also has a very strong technically qualified engineering team and adding more about its team, Yash states, "Our team has expertise in all sectors, right from technical and manufacturing knowledge to sales. We discuss most functions of manufacturing process and idea to gain more views and inputs from the team. Marketing and finance are also areas where we have expert professionals. Apart from this, we monitor the day-to-day marketing and administration with the entire team as well". Evolving with the changing times, Hittco Tools is currently in the process of launching carbide Inserts and CNC Tool holders in the near future. is currently in the process of launching carbide Inserts and CNC Tool holders in the near future. The company is also making arrangements to grow its team and expand its product lines even more in the coming years. ||
